Make silhouette out of Jose.

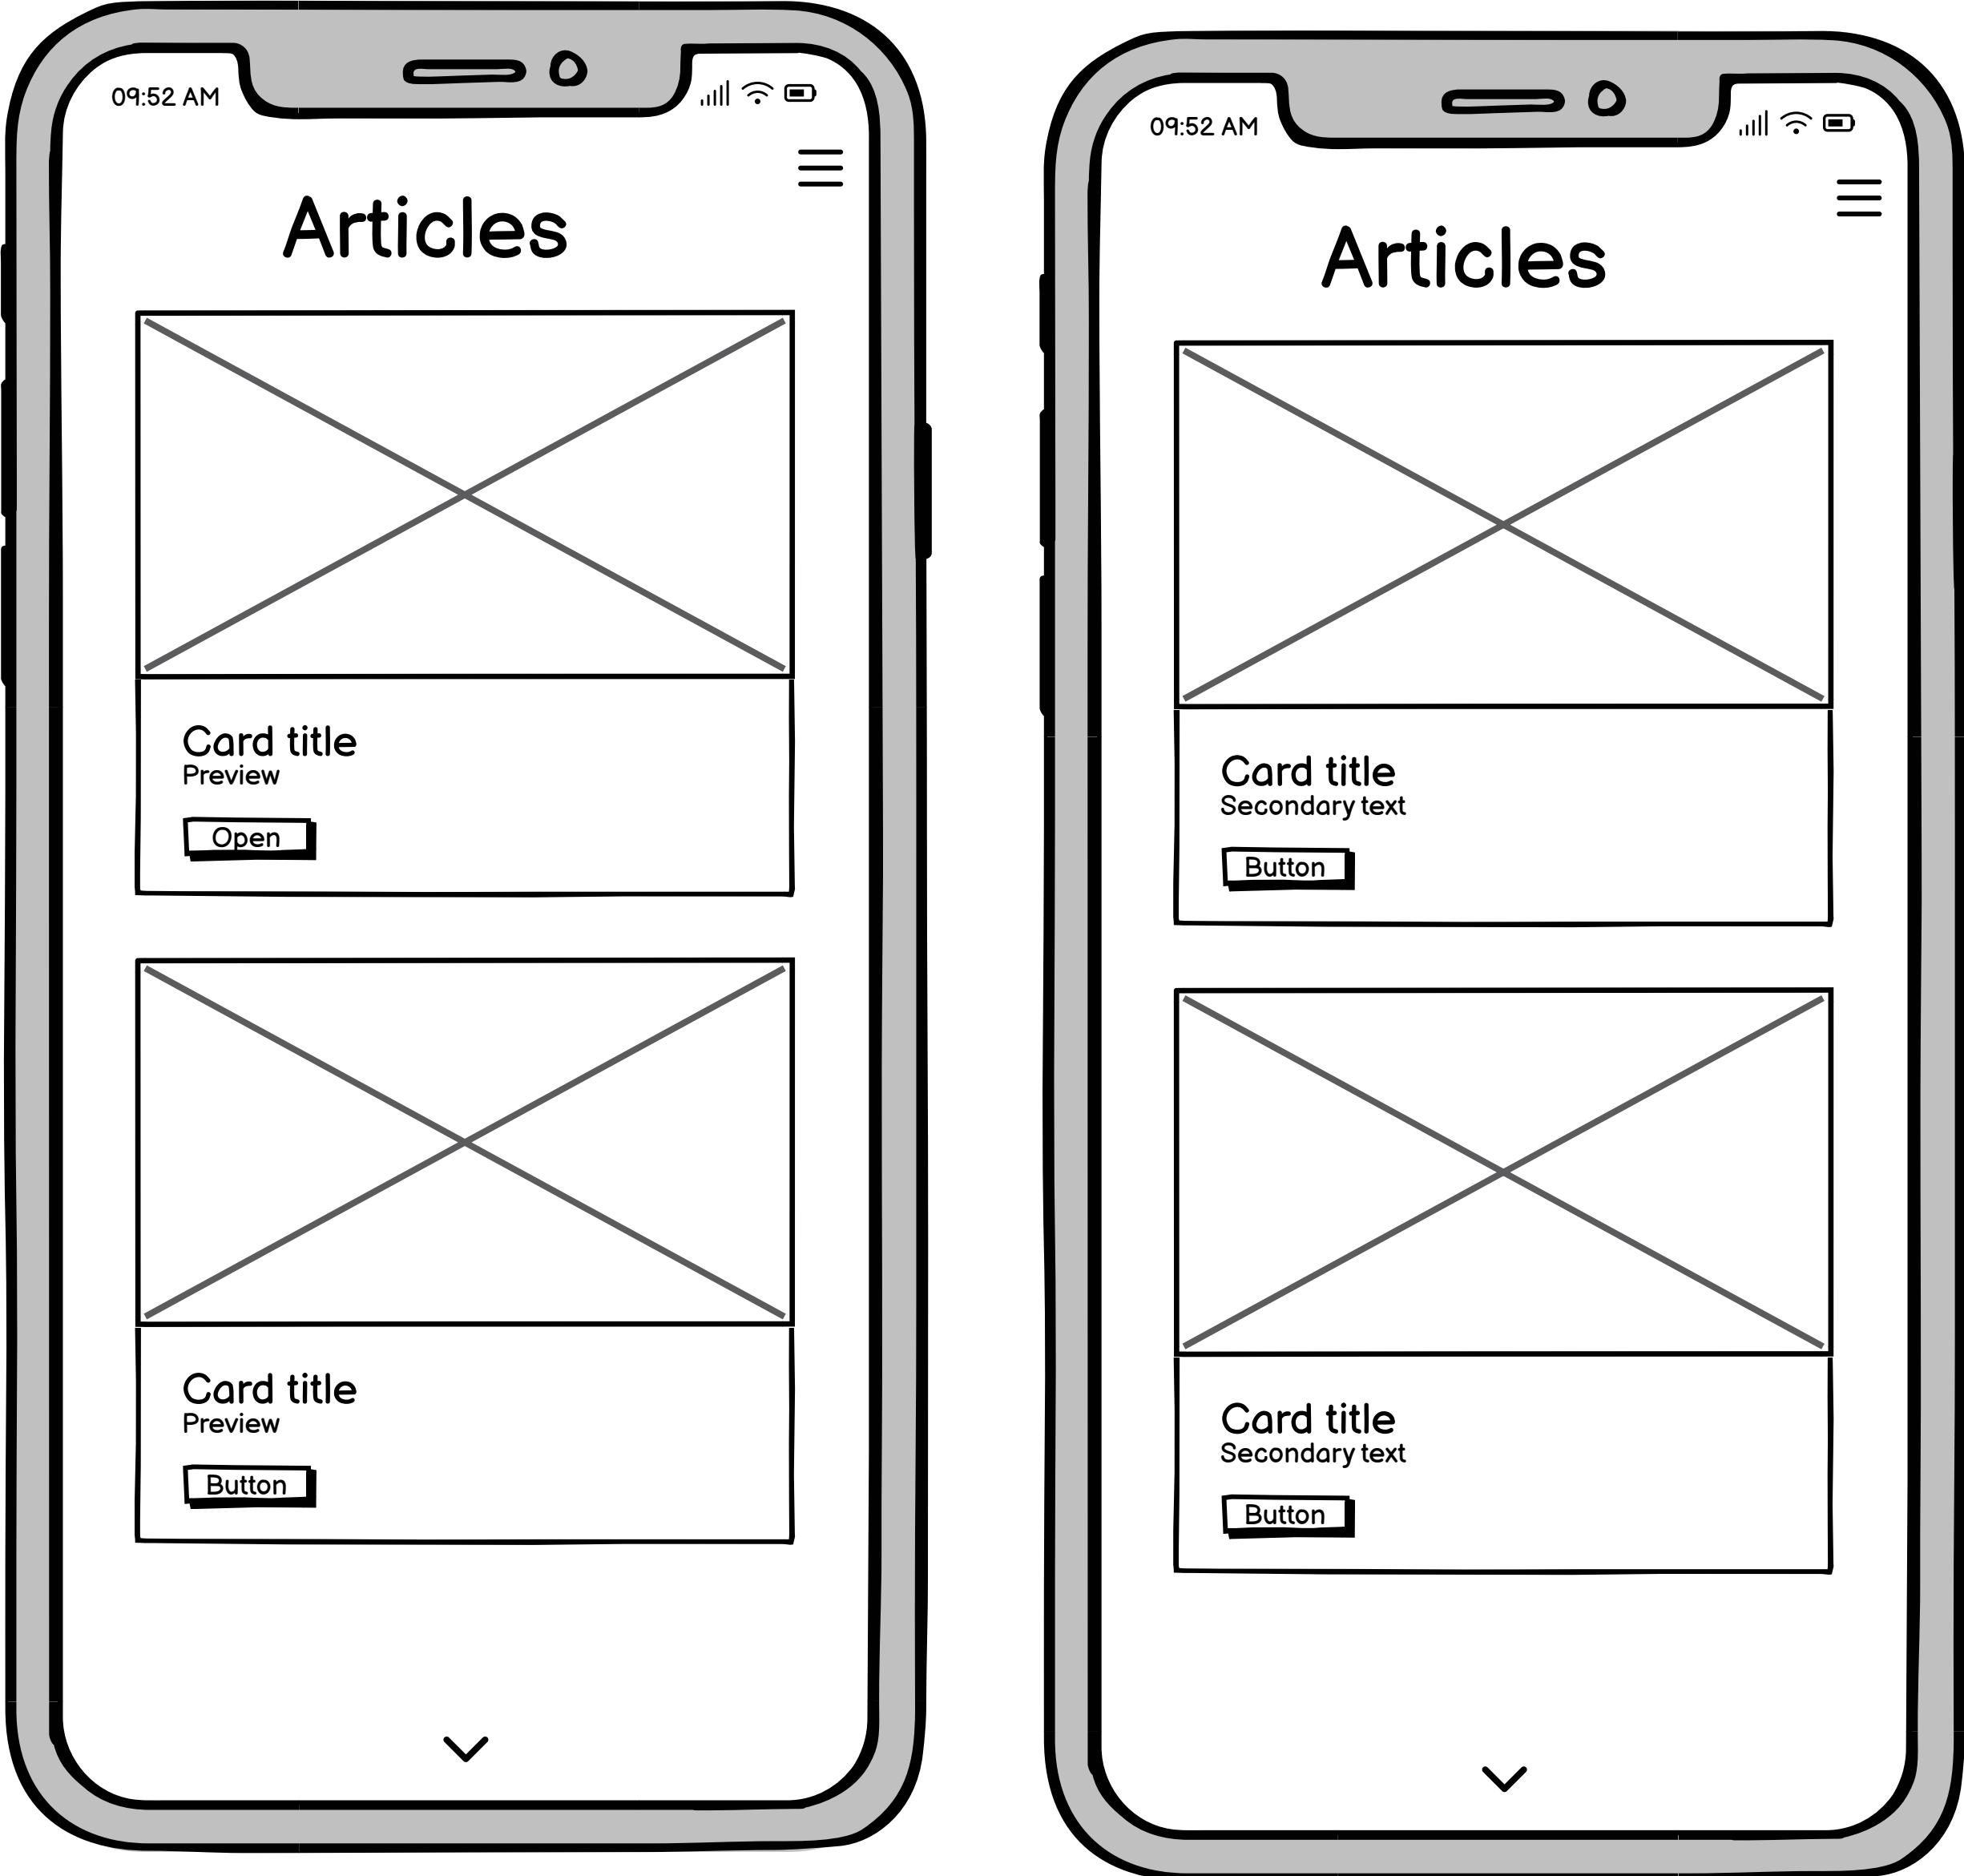

Keep gray background on all pages.

QR code at jose's house leads to the home page

Other QR codes specific to other places lead to article page

Info is filled in with information in the database and the page looks like a biography of Jose

There is going to be a card on the admin page to change/add all the info

maybe we can add a filter section on top so the user can filter the article on title, location..?

For every article/ place there should be a card

Article with Title, Image (if provided), small text and a button to see the full article

If the button is pushed the user goes to the About page where they can see the full article

09:52 AM

Location name

Map of the location

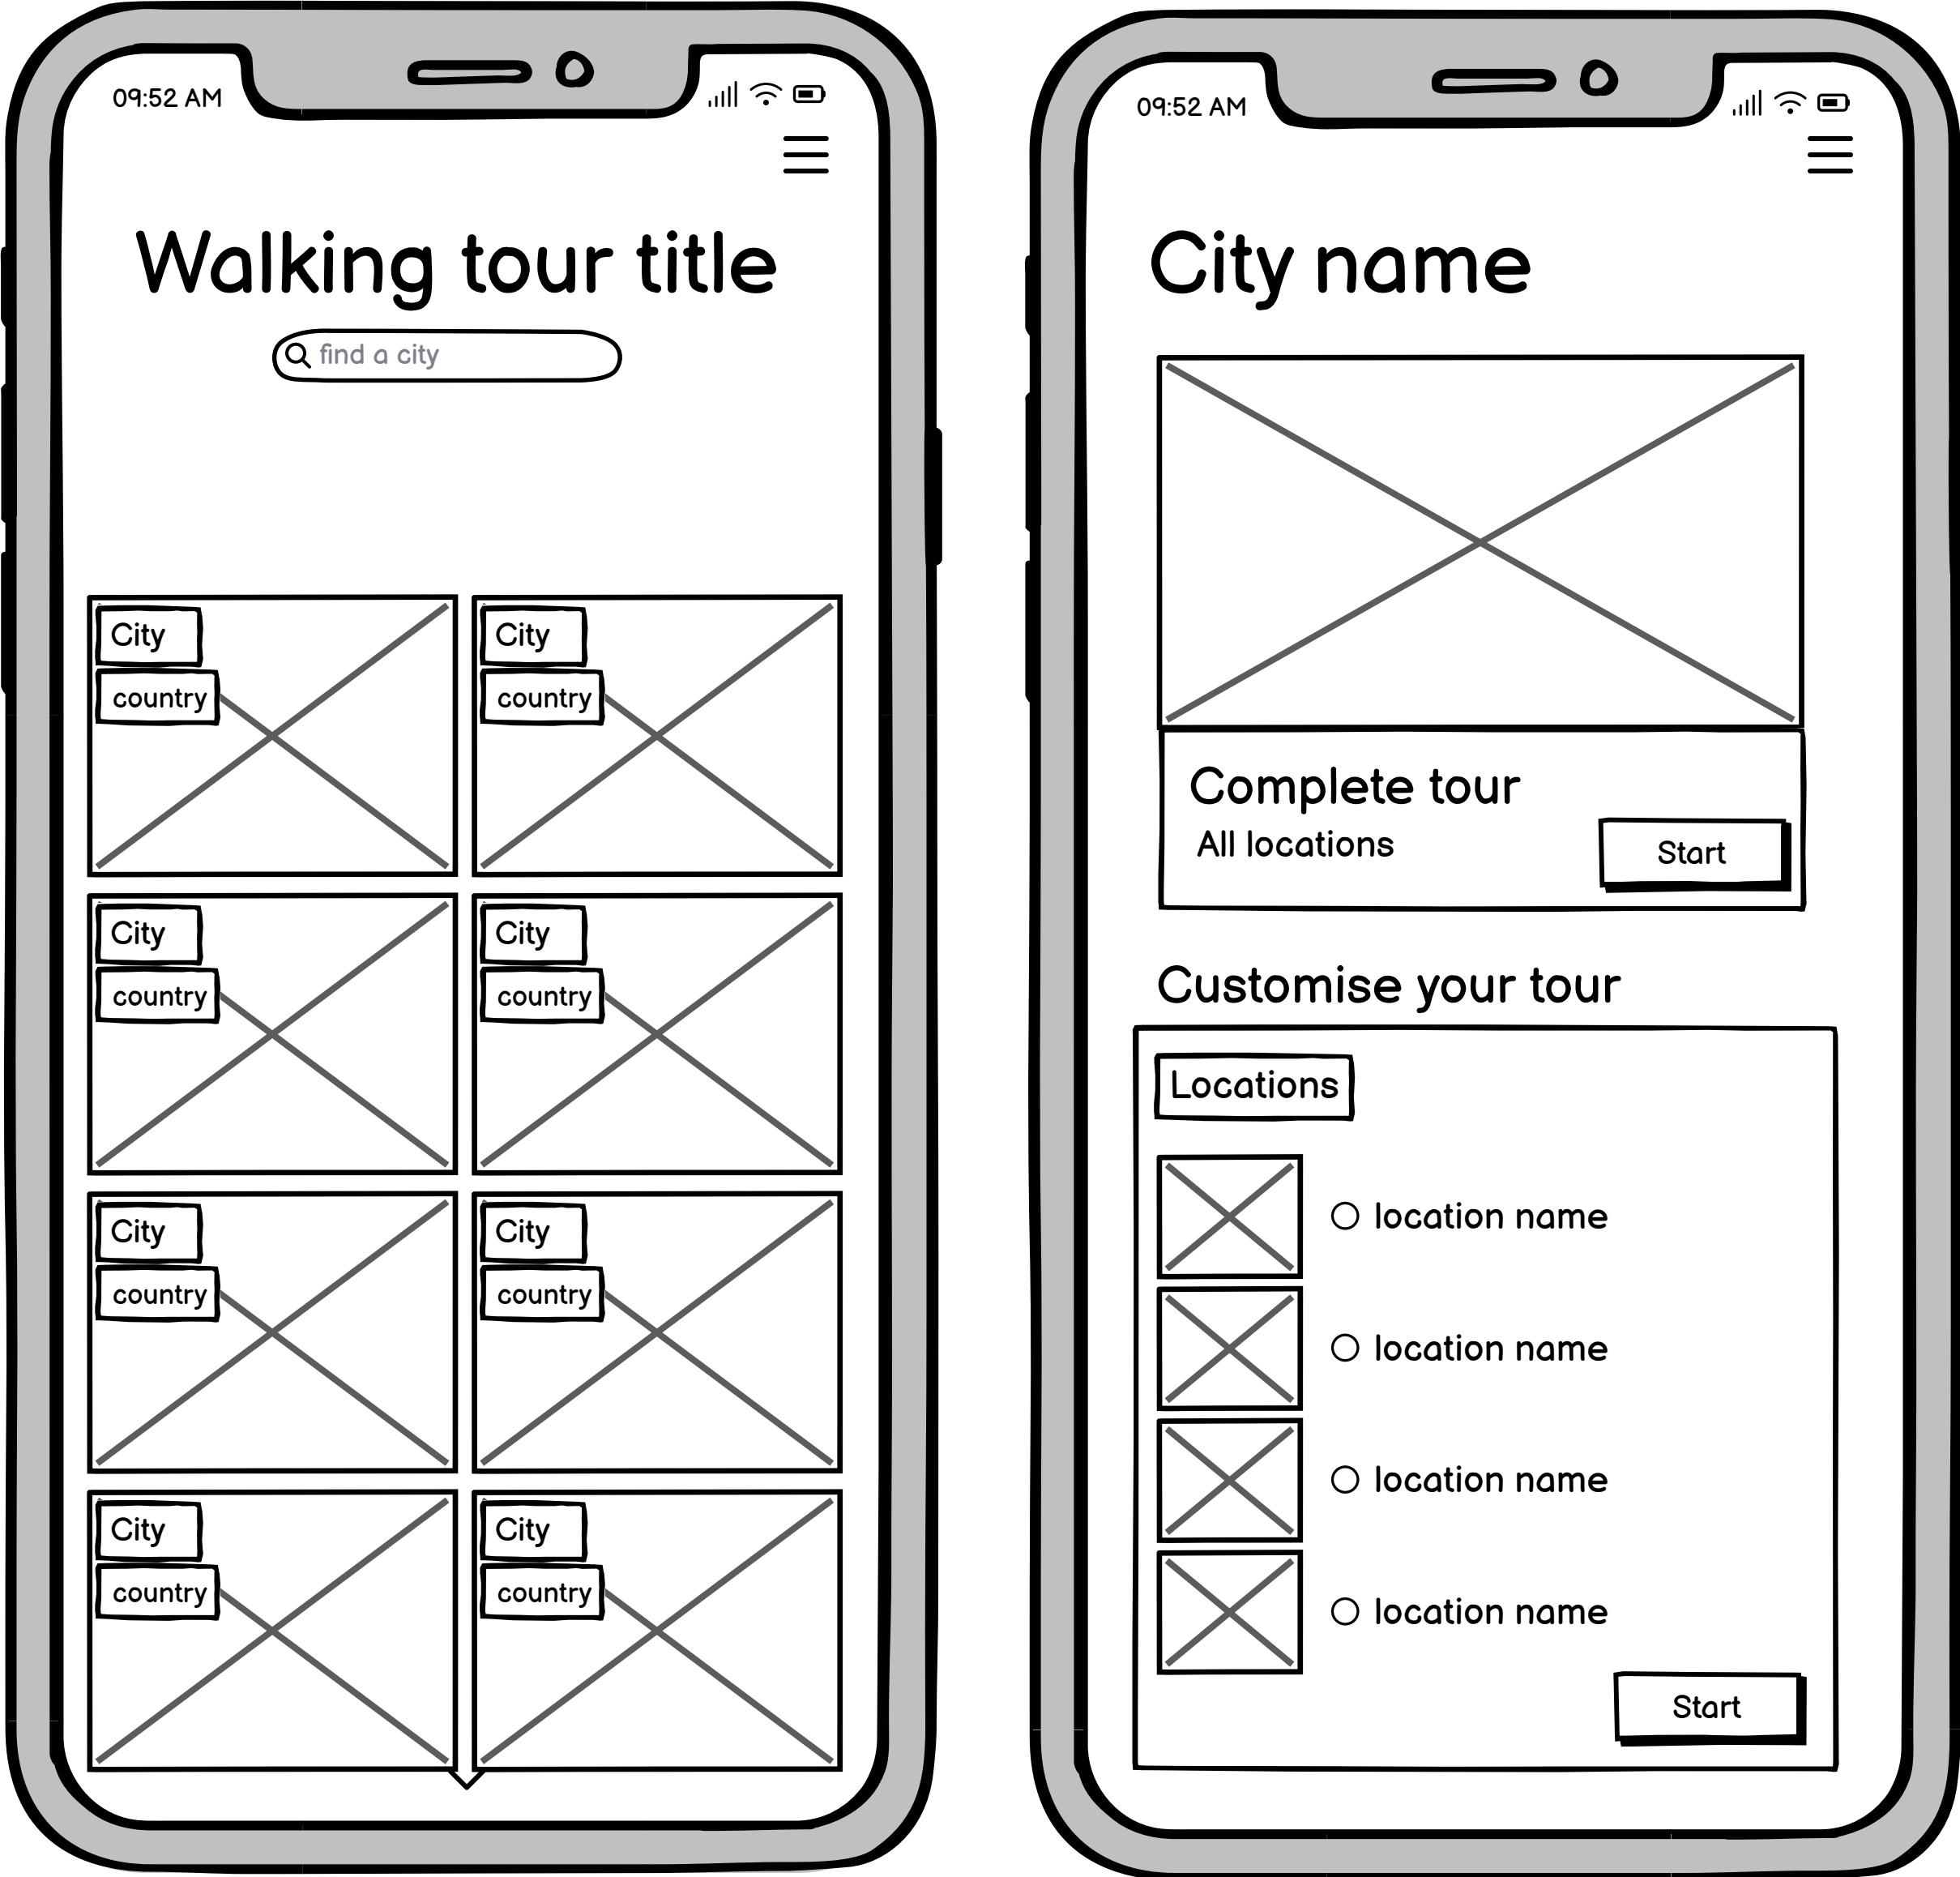

Auto render the info of the article through the unique id of the 'card' that is pushed

The user only sees this page if the button is pushed on the preview page

If there is a location this location goes onto the walking tour page

This pages shows the full info of the article, with a title, image if provided, subtitles if provided and a map of the pinned location if a location is provided

This page has all the locations that the admin filled in, the user can filter on city or can choose from the city cards, if the user had chosen a city the user goes to a page specific to the city where a complete tour that visits all the locations or make a customise tour if the user picks the customise tour, they can select which places they want to visit and the google API will calculate a tour for them

Before going to the administration page, the user gets a login screen, if the login is verified the user can get into the administration page. otherwise an error shows up add a card for the home page info as well

The add button always stays on top if you scroll down

Shows the content of an article in a card form, if the user pushes the edit button it brings them to the add/edit page, if the user pushes the delete button it deletes the record the add button brings the user to the add/ edit page.
